

EDUCATION

- **Master of Engineering in Computer Engineering** 2021-2023
University of Phayao
- **Bachelor of Science in Information Technology** 2015-2019
University of Phayao

PROJECTS

- **Web-Based Product Verification System for E-Commerce**
A web-based product verification system implemented using a Chrome extension.
 - Facilitating product verification on e-commerce websites.
 - Utilized the Longest Matching technique and word segmentation.
 - Technologies Used: Node.js, Vue.js, Bootstrap, and RESTful APIs
- **Advanced Queue Management System for Efficient Customer Service**
A web-based vehicle inspection facility.
 - Users can reduce wait times for vehicle inspections.
 - Technologies Used: Node.js, Vue.js, Bootstrap, LINE Notify, and RESTful APIs
- **Customer Satisfaction Survey System for Services Provided by the Chiang Rai Provincial Transport Office**
A website designed for conducting satisfaction surveys of customers who use the service.
 - Technologies Used: Node.js, Vue.js, Bootstrap, and RESTful APIs
- **System for Requesting Permission to Move Out of the Way**
A website for requesting permission to move out of the way.
 - Technologies Used: Node.js, Vue.js, Bootstrap, LINE Notify, and RESTful APIs
- **Relief Assistance System for Individuals Under Investigation**
Help and support to provide relief to those affected by compliance with government officials' orders.
 - Technologies Used: Node.js, Vue.js, Bootstrap, and RESTful APIs

TRAINING

- **Super AI Engineer 2020** Oct 2020 - Apr 2021
Artificial Intelligence Association of Thailand
 - Extensive knowledge in AI Technology, Image Processing, Signal Processing, Data Science and Data Analytics, Internet of Things, Big Data Analytics, and more
 - Practical experience in solving real-world problems for business organizations

TECHNICAL SKILLS

Programming Languages : Python, Javascript, PHP, TypeScript, and HTML/CSS
Web Development Frameworks : Angular, Vue.js, and Ionic
Data Analysis and Machine Learning : NumPy, Pandas, Keras, and Chart.js
Development Tools : Node.js, VSCode (Visual Studio Code), Git, GitHub, and Postman
Databases : MySQL and MariaDB
Relevant Coursework : Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management Systems, Project Management
Areas of Interest : Web Design and Development, Full Stack Developer
Soft Skills : Problem Solving, Self-learning, Adaptability

POSITIONS OF RESPONSIBILITY

- **Full-Stack Developer** Freelance Developer Apr 2021 - Current
 - Design and develop a website based on user requirements.
- **Junior Programmer** Wingplus Solution Jun 2019 - Dec 2020
 - Create a website based on user requirements.
